WORK EXPERIENCE

Front End Developer Digikull

09/2022

Achievements/Tasks

- **Thali App** - The user can customize the content of Thali. We can add or remove following items and change the quality of these items: - Chapati - Pickle - Curd - Sweet - Daal - Paneer Dish.[Link-](#)
- **Tip Calculator in Javascript** - As a user, you go to a restaurant, based on your experience you want to pay tip to the waiter, if the your overall experience is good you pay higher tip amount also added a Validate the value entered in to total bill, if the user is entering anything apart from numbers in the input, user should get error message. [Link-](#)
- **Tip Calculator in React** - As a user, you go to a restaurant, based on your experience you want to pay tip to the waiter, if the your overall experience is good you pay higher tip amount also added a Validate the value entered in to total bill, if the user is entering anything apart from numbers in the input, user should get error message.[Link-](#)
- **Contact App** - In this app the user can add the contact with their name, email and number, there is one validation if the user enters less than 10 digits in number then the user gets an error in alert box, on click save contact button the user can see the contact list with the update contact, and in contact list there is two buttons on every contact one is for edit and second is for delete if the user clicks edit button then the edit window is open and the user can change the contact detail as per their requirement. Technology = React component, routing and react hooks.[Link-](#)
- **Amount Change** - Set up a simple ReactJS application that models a user's bank application, in addition to the user being able to view their total balance, they can also perform withdrawal actions functionally = Handle the withdrawal actions to actually deplete the user's balance i.e. on clicking the buttons, the balance reduces. Technology = react component, redux store.[Link-](#)
